

Event Update

DEAR IEEE AUSTRIA SECTION MEMBERS,

The best conversations happen during a walk together or afterwards over a festive buffet. Therefore, you are cordially invited to the

[IEEE Spring Festival of IEEE Austria](#)

We have 1300 IEEE members in Austria, but little opportunity to meet all of us. This time there will be no technical lecture. Networking between members and seeing old acquaintances and young new members is the goal.

Further details (incl. registration link) is provided at the [section's website!](#)

IEEE SECTION AUSTRIA IS SUPPORTING STUDENT ACTIVITIES

The IEEE Austria Section is supporting students in enhancing their career and setup innovative events together with their study colleagues by offering two award programmes specifically designed for them. The **IEEE Austria Student Mobility and Conference Grant** support section student members to participate at conferences, workshops and other educational activities in the fields of IEEE and related. The goal is to assist applicants to advance their education, make international contacts and gain additional experience. Deadlines for submissions are 1st of February, 1st of June and 1st of September each year.

The IEEE Austria Student Branch Award encourages innovative new concepts applied by the Student Branches and activities or events creating positive impact for students. If students created some cool new events or did something special they can contact the local student branch or the student branch coordinator . They will be happy to integrate their efforts and apply in one of the categories of the Student

Branch Award.

Deadline for submission is the 15th of September.

Conferences

ConTEL 2023 - 17th International Conference on Telecommunications

The 17th International Conference on Telecommunications, ConTEL 2023, will be held in Graz, Austria, on July 11–13, 2023. Through its technical program, the conference will provide an opportunity for the academic and industrial communities to address new research challenges, share solutions and discuss issues in information and communication technology (ICT) referring to modern telecommunications.

The ConTEL 2023 aims to reflect on current and emerging networking technologies that enable ubiquitous Internet and communications as key drivers of connected information society. With new services and access networks, there is a growing need for improvement in networking infrastructure – not just in terms of quality and performance, but also in scalability, mobility, energy efficiency, and multiple technologies integration. Original research papers are solicited that present theoretical, as well as applied, practical and experimental work related to the areas and topics of interest listed below. The conference program will offer technical sessions, presenting the latest advances through peer-reviewed regular and special sessions, as well as workshops with focus on the latest breakthroughs in selected areas related to the conference. The format of the event will take into account the COVID-19 situation and travel restrictions. Our wish, and goal, is to have a live event, with virtual participation as necessary. Stay safe and healthy and we hope to see you in Graz next year!
